

SORTING GRAPPLE

EFFICIENTLY UNLOAD LOG TRUCKS

EASY TRUCK UNLOADING

Rockland Sorting Grapples unload trucks from the top down. The tines and clamp are designed to quickly grab a grapple full by reaching around both sides of a load. This unique ability makes truck unloading and log handling faster and more productive. Optional kickers are available for high-stack applications.

BUILT TO LAST

Rockland Sorting Grapples are built tough and designed for years of dependable service. These features guarantee performance you can depend on: rugged, high-strength steel construction; wide clamp pivots with sealed, replaceable bearings; case hardened pins; heavy-duty hydraulics; clamp cylinders equipped with chrome-plated, induction hardened cylinder rods.
